Form & Availability

Pre-Tinted

All 22 oz cartridges, 1-gal kits and 2-gal kits ship pre-tinted with color. Shaking the product for 60 - 90 seconds is all that is required prior to use.

Curecrete stocks pre-tinted 10-gal kits in limited colors. It is important to thoroughly mix side-B for 3 minutes with a drill and jiffy mixer.

Tint Packs

Tint packs are designed for 10-gal kits and must be added to the untinted, side-B pail. Once added, mix side-B thoroughly for 3 minutes with a drill and jiffy mixer.

It is important to note that tint packs are produced specifically for each product offering and are not interchangeable between products. This is due to the varying chemical composition of each product.
