Mr. Gerald Jones
Curecrete Chemical Company
1201 West Spring Creek Place
Springville, Utah 84663-0551

Dear Mr. Jones

In June of 1987, after much research, we applied your Ashford Formula to the floor of our newly constructed and leased 227,000 square foot building. Our primary purpose in using Ashford Formula was to dust proof, seal and harden the floor so as to make it as maintenance free as possible.

It is now almost two years later and we have accomplished our purpose. The floor is virtually dust free, has developed a sheen that almost sparkles and is indeed maintenance free. To have used poly-type sealers would have no doubt required at least two additional applications and further applications in the future.

I congratulate you on a great product.

Sincerely

R. A. Tillery
Regional Distribution Traffic Manager
